

Memory techniques

Experts believe that you can hold approximately seven items in **short-term memory** for about 20 to 30 seconds.

Researchers have found that **being tested on information** is actually one of the **best ways to improve recall**.

I MAY HAVE BAD MEMORY

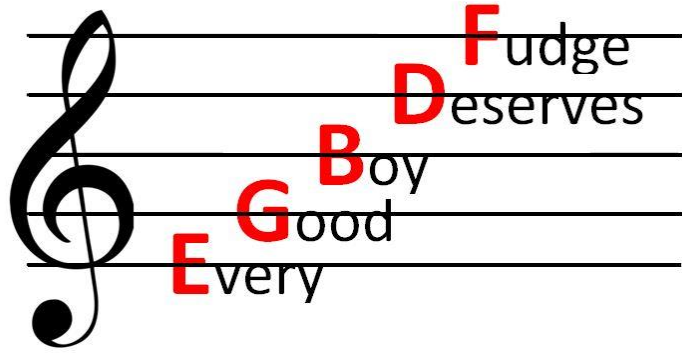

BUT AT LEAST I DON'T
HAVE BAD MEMORY

One experiment has found that students who **studied** and were then **tested** had **better long-term recall** of the materials, even on information that was not covered by the tests.

Students who had extra time to study but were not tested had significantly lower recall of the materials.

Mnemonics

You might use mnemonics to remember lists, such as:
The order in which snooker balls are potted
You **G**o **B**rown **B**efore **P**otting **B**lack
(yellow, green, brown, blue, pink, black)

rhythm
